1. Whereas,Kite flying has been a passionate sport in Delhi. In common Parlance two typesof threads known as "Manjha" i.e. ordinary **MANJHA"** and special "MANJHA"are used for the purpose of kite flying. Earlier the special "MANJHA" was madeof threads coated with local adhesive and fine dust of glass which would actlike a razor to cute the "MANJHA" of other competitors.
2. Whereas,now days, a new type of "MANJHA" with metallic powder cating is available inthe market. This type of "MANJHA" is not aonly very strong but also a goodconductor of electricity. Due to a fine metal coating, whenever such "MANJHA"entangles/comes in contact with overhead electricity supply cables includinghigh voltage lines, electricity current runs through the "MANJHA" thread,resulting in danger of electrocution of the kite flier or a passer-by and alsocauses disruption of power supply system.
3.
