Kiteflying has been a passionate sport in Delhi. For **kites flying,** mainly two types of threads, known as "manjha"in common parlance, are used i.e. ordinary 'manjha' the special 'manjha'. Earlier, the special 'manjha' was made of athread coated with local adhesive and the fine dust of glass which acts like arazor to cut the 'manjha of other competitors.

2. Whereas, a new type of **'manjha**' with metallic powder coating, is availablein the market. This type of 'manjha' isnot only very strong but also a good conductor of electricity. Due to a fine metal coating, whenever such'manjha' entangles/copies in contact with overhead electricity supply cables,including high voltage lines, electric current funs through the 'manjha'thread, resulting in danger of electrocution of the kite flyer or unsuspectedpasser-by and also causing disruption of the power supply system.

3. And whereas, it has been found that thethreads with metallic powder coating,being used or kite flying are good are conductors of electricity and aredangerous to electricity installation, as well as to the persons using them asit may cause flash over the overhead transmission lines and electrocution of theindividual.

4. And whereas, it is necessaryto take suitable measures to prevent danger to the electrical installations,annoyance to the public, danger to human life and safety and the disturbance ofthe public tranquility:
